Hi Michele and Rick

here are new photos from last night and I have another email I will send after this from this morning.

The water has moved further down to the left on the basement and yesterday and this morning, there was a ton more water. Additionally now where the dryer vent is at, there was a lot of water on the brick at the top, like the water was leaking in from the dryer vent and this morning the entire corner where the washer/dryer is located was soaked, thats the next set of pictures....

Dave
