Craig please see the attached pictures.. since it rained harder you will now see water at the top of the walls as well as more wet areas in the bottom of the walls. Again almost the entire length of the basement wall is now dark which to me indicates wet. Additionally the area to the right of the media panel seems to still be getting darker so I am not convinced this area is fixed. Also the area by the breaker box is back as well as a new area at the top part in the middle of the basement wall....

Please confirm these have been received....

You have been sent 12 pictures.
