Marti and Craig

here are 92 pictures from today THursday Sept 29th 2005. As you can see nothing has changed at ALL! Something major has to be done and I'm not an engineer but from looking at these pictures and knowing what you've already done, what was done already seemed like it resolved absolutely nothing at all... A lot of the pixs may seem the same and some are, some are not.

Look at the pictures; water in our foyer running almost to our carpet. Water everywhere on almost every wall in the basement! This is old news and getting older by the minute.

additionally the grout in our foyer is starting to crack around the door due to all of the water just laying there. Believe it or not I work for a living and can't sit in my foyer to soak up the rain the very second it happens so due to this issue some of the rain has sat in our foyer for hours while Chris and I were both working because there is no one else here....

- 1st priority foyer water and all of the basement water fixed!
- Need to see if this constant water around and behind our breaker box could one day start a fire in our house!
- Since the grout around the door is cracking that needs to be fixed so you'll need to buy new grout and have someone pull out the grout thats cracked in put in new grout without damaging my new ceramic floor tiles.
- Chaulking around our entire front house like was done one other time

won't fix this, so instead of loading up the chaulking to make our house look worse there needs to be a permanent solution to this.

- Find a way to clean the water stains off the basement walls somehow. Don't care how you do it, but once this is permanently fixed we are not looking at water stains on our walls from that point on. I am taking NO chances in the resale value of our home due to this major HHI issue that should have been resolved last year!

- I didn't have time to take a picture tonight, but whoever put the additionally black waterproofing around our basement wall again was kind enough to place some of this TOO high. Now there is black exposed that needs to be cleaned off or something. You can landscape that high because its up there and we are NOT leaving this black tar substance out in plain site..

- I guess I need to start checking with the neighbors also. I can't be the only one with this issue

I left Craig a voicemail this morning and here are the pictures. As you can imagine I can't sit and watch this every single day, every single minute. Our floor is now being damaged, our basement walls are all stained, black tar in the front of our house for all to see, water still comes in our basement and even though our front door was replaced, this morning I woke to the site of water coming in our foyer once again....

Someone needs to let me know what is going on from this point on and how things are moving forward and to resolution!

Sincerely  
Dave Romesburg

Marti and Craig

I've never heard back from anyone regarding these pics I sent in as well as how HHI is moving forward to resolve this issue?? Today is October 13th and I guess much in the HHI tradition and they only way I guess HHI works, its been 2 weeks and nothing from anyone...

Guess this is going to be the same as before since water is still the issue and nothing has changed including where the water comes in the house...

thanks and once again just wanted to play fair..
