Can you please make sure Craig gets this...

Craig

here are a few pictures from early evening today, around 6:00pm... Note the water in the corner where the washer/dryer is located..

I will leave you a voicemail in the morning (it is Tuesday PM now) regarding this email to look for...

I know Steve is coming out to put the stain remover on the brick next Tuesday, so I wanted to make sure this was hopefully corrected before he came out..

just reminders...

- still need the front numbers changed

- also the door trim has a lot of raised patches that need sanded down and repainted

- all shrubs are dead because I think there is not enough soil for the shrubs to grown

- major crevices need filled in on the side of the house, could potentially cause anyone to trip and fall at night if folks don't realize those crevices are there.

a lot of people walk their dogs in our side yard.

also a lot of the black tuff-n-dri is showing around the house. ground needs to be raised to cover this and the side of the house there is a long area that also needs filled in with soil

- basement stains - are already scheduled

Thanks

Dave Romesburg
